

Sofà

Francesco Binfaré

General description:

Classical sofa both for its shape and elegant dimension. The metal frame is fixed on steel bars, granting Sofà a perfect stability. The padding is realized through a perfect mixture of Gellyfoam® (a technological material made of a mixture of foams patented by edra) and natural or synthetic material, which makes Sofà unique in its comfort.

Sofà can therefore be declined in several versions:

normal seat/low back; normal seat/high back; extended seat/high back; extended seat/low back.

The cover is realized with natural leathers or very thick and soft fabrics, so that the body can be welcomed by the special and comfortable padding.

Use:

Low backrest sofa allowing a formal but extremely comfortable seating. By slipping forward and laying with the nape on the backrest the comfort remains very high. It can be used also laying comfortably the head on the armrest, as it is provided, as the backrest, of a shaped structure and a skillfully hand filled padding.

The absolute stability is granted by the junction bars which assure the unique comfort of Sofà.

Technical description:

Steel structure.

Padding available as:

- Sofà Feather (seat in Gellyfoam® and Feather)

- Sofà Synth (seat in Gellyfoam® and Synthetic Wadding).

Base with junction bars in epoxy lacquered steel.

Feed in molded ABS.

Undercover in cotton fiber.

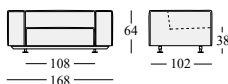

Removable cover.

On request, product can be realised also responding to other specific regulation required.
