

Sofà Gran Khan

Francesco Binfaré

General description:

Classical sofa both for its shape and elegant dimension. The metal frame is fixed on steel bars, granting Sofà a perfect stability. The padding is realized through a perfect mixture of Gellyfoam® (a technological material made of a mixture of foams patented by edra) and natural or synthetic material, which makes Sofà unique in its comfort.

The cover is realized with natural leathers or very thick and soft fabrics, so that the body can be welcomed by the special and comfortable padding.

Sofà Gran Khan

In the size 276 with a rough cut leather thrown on it, Gran Khan; the sofa has wild reminiscence of the primitive couches of the Mongolian tents. Gran Khan is inspired by the tradition of the nomadic peoples living in the lands of the "crescent moon". The cover is a large mantle made of two rough-cut leathers of remarkable thickness (4 mm.), centrally seamed and joined invisibly to the sofa by two big aluminum hooks fasteners.

Use:

Low backrest sofa allowing a formal but extremely comfortable seating. By slipping forward and laying with the nape on the backrest the comfort remains very high. It can be used also laying comfortably the head on the armrest, as it is provided, as the backrest, of a shaped structure and a skillfully hand filled padding.

The absolute stability is granted by the junction bars which assure the unique comfort of Sofà.

Technical description:

Steel structure.
